Dear Sir,

Thank you for leter of reception of Radio Station WCCN. I am sorry that I have not had an opportunity to verify it before this time, but we operate a little short handed here. Only six employees.

Since your reception, we have increased the height of our tower by 140 FEET. PERHAPS This will increase the signal in your area.

Enclosed you will find a coverage map, and some interesting information about our primary area.

Sincerely yours,

Charles E. Marvin
Chief Engineer
